

FLWEMS Paramedic Medication Information For:

MEDICATIONS

(Maintained on FLWEMS Ambulances)

Indications

Usage of emergency/urgency medications and/or formularies maintained on FLWEMS Advanced Life Support ambulances. This index outlines the specific pharmaceutical supplies and the supplemental data for those medications maintained on all Fort Leonard Wood Emergency Medical Services ambulances and the US Army Chemical Defense Training Facility.

General

FLWEMS Paramedics may use those medications maintained in General Leonard Wood Army Community Hospital ambulances for pre-hospital medical/trauma/psychiatric emergencies and intra-facility patient transfers as needed.

In the event that these medications are required, FLWEMS paramedics shall thoroughly document appropriately on Paramedic Patient Care Reports. This guidance applies to all medications, controlled and uncontrolled.

Specific formulary information such as category, alternate names, regimens, indications, dosages, administration routes, contraindications, reactions, etc. may be found in the USAMEDDAC Fort Leonard Wood Medical Services Formulary, Physician Drug Reference guide or other approved paramedic & nursing drug guide references.

These medications and formularies are identified below.
